Profile

Applied Computer Science student who builds software and hardware, from Power Platform apps for a school's finance team to the transport system of a robot production line. Co-founder of Cognitive Atmospherics.

Education

Since 09/2024 — **Applied Computer Science**, Saxion University of Applied Sciences, Enschede

- Propaedeutic diploma cum laude, Honours Programme (second year), graduating 2028
- Highest distinction at International Project Week (a Bronkhorst configurator in one week)
- Minor Industrial Automation, 09/2026 to 02/2027: ABB robots, PLCs, SCADA

08/2022 to 05/2024 — **IB Diploma**, Munich International School

- Higher Level: Computer Science, German, Geography
- Extended essay: did London's Ultra Low Emission Zone cut CO2?

Projects

09/2026 to 02/2027 — **A production line for a LEGO bulldozer**
Eight ABB robots build a LEGO bulldozer every five minutes, team of thirteen. I am responsible for the transport system: pneumatic stops, parts at each station on time, every part tracked.

2026 — **Profiling traffic by sound**
Solo. A Raspberry Pi that profiles traffic by sound alone: CUSUM change detection, three classifiers compared in MATLAB (including k-NN and a 1D CNN). Graded 9/10.

2026 — **Scan Assistant**
Chrome extension that scans the school's iPads in and out of Snipe-IT against class lists. My idea and prototype, built largely with AI coding tools. In use.

Experience

Since 06/2026 — **Co-founder, operations, software and finance**, Cognitive Atmospherics

- Operations, software, investors and financing, AI that runs a room's climate
- €2,500 from the Saxion Entrepreneurship Programme, second prototype in progress

06/2024 to 07/2026 — **IT support and Power Platform developer, on contract**, Munich International School

- Supported IT and built apps and automations on Microsoft's Power Platform
- Rebuilt the finance team's purchase orders in Power Apps (automatic totals and exchange rates)

Summers 2021, 2022 and 2023 — **IT department, summer work**, Munich International School

- IT in 2021 and 2022, IT and finance in 2023

03/2021 to 11/2023 — **Freelance developer**, Self employed

- Full stack web platforms with secure logins and live monitoring
- A support and ticketing system, sold to almost ten customers

Skills

Software	JavaScript and the web, Node.js, Express and MySQL, Browser extensions, Microsoft Power Platform
Hardware and automation	ABB robots and RobotStudio, PLCs, SCADA and vision systems, Raspberry Pi, Embedded C and C++
Data	Signal processing and change detection, Machine learning, MATLAB

Languages and more

Languages	English (First language), German (B2)
Also	Sustainability ambassador
